Part II: Certification	II. Health information		
	<p>I, the undersigned official veterinarian, hereby certify that:</p> <p>(1) <input type="checkbox"/> II.1. The in vivo derived embryos of ovine(1)/ caprine(1) animals described in Part I have been collected, processed and stored, and dispatched by the embryo collection team(2) which</p> <p>II.1.1. is approved and kept in a register by the competent authority;</p> <p>II.1.2. complies with requirements as regards responsibilities, operational procedures, facilities and equipment set out in Part 2 of Annex I to Commission Delegated Regulation (EU) 2020/686.]</p> <p>(1) <input type="checkbox"/> II.1. The oocytes(1)/ in vitro produced embryos(1)/ micromanipulated embryos(1) of ovine(1)/ caprine(1) animals described in Part I have been collected or produced, processed and stored, and dispatched by the embryo production team(2) which</p> <p>II.1.1. is approved and kept in a register by the competent authority;</p> <p>II.1.2. complies with requirements as regards responsibilities, operational procedures, facilities and equipment set out in Parts 2 and 3 of Annex I to Delegated Regulation (EU) 2020/686.]</p> <p>II.2. The consignment consists of embryos of the ovine or caprine species which comply with the following conditions as regards classical scrapie:</p> <p>(1) <input type="radio"/> either [they were collected from animals which have been kept continuously since birth on a holding or holdings recognised as having a negligible or a controlled risk of classical scrapie in accordance with point 1 of Section A of Chapter A of Annex VIII to Regulation (EC) No 999/2001, except during the period when they were kept at a semen collection centre that complied during that period with the conditions set out in the four indents of point 1.3.(c)(iv) of that Section;]</p> <p>(1) <input type="radio"/> or [they were collected from animals which have been kept continuously for the last three years before the collection on a holding or holdings which have complied for the last three years before collection with the requirements laid down in points (a) to (f) of point 1.3. of Section A of Chapter A of Annex VIII to Regulation (EC) No 999/2001, except during the period when they were kept at a semen collection centre that complied during that period with the conditions set out in the four indents of point 1.3.(c)(iv) of that Section;]</p> <p>(1) <input type="radio"/> or [they were collected from animals which have been kept continuously since birth in a Member State or zone of a Member State listed in point 2.3. of Section A of Chapter A of Annex VIII to Regulation (EC) No 999/2001 as having a negligible risk status for classical scrapie;]</p> <p>(1) <input type="radio"/> or [they were collected from ovine animals and</p> <p>(1) <input type="radio"/> either [are of the ARR/ARR prion protein genotype;]</p> <p>(1) <input type="radio"/> or [carry at least one ARR allele;] ]</p> <p>II.3. The oocytes(1)/ embryos(1) described in Part I are intended for artificial reproduction and were obtained from donor animals which</p> <p>II.3.1. have been born and remained since birth in the Union, or have entered the Union in accordance with the requirements for entry into the Union;</p> <p>II.3.2. come from establishments in a Member State or zone thereof, or from establishments under official control by the competent authority in a third country or territory, or a zone thereof</p> <p>II.3.2.1. free from infection with Brucella abortus, B. melitensis and B. suis and have never been kept previously in any establishment of a lower health status;</p> <p>(1)(3) <input type="checkbox"/> II.3.2.2. in which infection with Mycobacterium tuberculosis complex (M. bovis, M. caprae and M. tuberculosis) has not been reported during the last 42 days prior to collection(1)/ production(1) of the oocytes(1)/ embryos(1);]</p>		

Part II: Certification	II. Health information		
	<p>(1)(4) <input type="checkbox"/> [II.3.2.2. in which surveillance for infection with Mycobacterium tuberculosis complex (M. bovis, M. caprae and M. tuberculosis) has been carried out on the caprine animals kept on the establishments during at least the 12 month period prior to collection(1)/ production(1) of the oocytes(1)/ embryos(1), as referred to in Article 15(3) of Commission Delegated Regulation (EU) 2020/688, and in case, during this period, infection with Mycobacterium tuberculosis complex (M. bovis, M. caprae and M. tuberculosis) has been reported in caprine animals kept on the establishment, measures were taken in accordance with Part 1(3) of Annex II to that Delegated Regulation;]</p> <p>(1) II.3.2.3. in which surra (Trypanosoma evansi) has not been reported during the 30 days period prior to collection(1)/ production(1) of the oocytes(1)/ embryos(1), and</p> <p>(1) <input type="radio"/> either [surra has not been reported in the establishments during the last 2 years prior to collection(1)/ production(1) of the oocytes(1)/ embryos(1);]</p> <p><input type="radio"/> or [surra has been reported in the establishments during the last 2 years prior to collection(1)/ production(1) of the oocytes(1)/ embryos(1) and following the last outbreak the establishments have remained under movement restrictions until</p> <ul style="list-style-type: none"> <li>- the infected animals have been removed from the establishment, and</li> <li>- the remaining animals on the establishment have been subjected to a test for surra (Trypanosoma evansi) with one of the diagnostic methods provided for in Part 3 of Annex I to Delegated Regulation (EU) 2020/688, carried out, with negative results, on samples taken at least 6 months after the infected animals have been removed from the establishment;]</li> </ul> <p>II.3.3. were examined by the team veterinarian or a team member and did not show symptoms or clinical signs of transmissible animal diseases on the day of collection(1)/ production(1) of the oocytes(1)/ embryos(1);</p> <p>II.3.4. are individually identified as provided for in Article 45(2) or (4), or Article 46(1) or (3) of Commission Delegated Regulation (EU) 2019/2035;</p> <p>II.3.5. for a period of at least 30 days prior to the date of first collection(1)/ production(1) of the oocytes(1)/ embryos(1) and during the collection period</p> <p>II.3.5.1. were kept on establishments not situated in a restricted zone established due to the occurrence of foot-and-mouth disease, infection with rinderpest virus, infection with Rift Valley fever virus, infection with peste des petits ruminants virus, sheep pox and goat pox or contagious caprine pleuropneumonia, or of an emerging disease relevant for ovine and caprine animals;</p> <p>II.3.5.2. were kept on a single establishment where infection with Brucella abortus, B. melitensis and B. suis, infection with Mycobacterium tuberculosis complex (M. bovis, M. caprae and M. tuberculosis), rabies, anthrax, surra (Trypanosoma evansi), infection with epizootic haemorrhagic disease virus, infection with bluetongue virus (serotypes 1-24) and, in case of ovine animals and those caprine animals which are kept together with ovine animals, ovine epididymitis (Brucella ovis) have not been reported;</p> <p>II.3.5.3. were not in contact with animals from establishments situated in a restricted zone due to the occurrence of diseases referred to in point II.3.5.1. or from establishments which do not meet the conditions referred to in point II.3.5.2.;</p> <p>II.3.5.4. were not used for natural breeding;</p> <p>II.3.6. comply with the following conditions as regards foot-and-mouth disease</p> <p>II.3.6.1. they come from establishments</p> <ul style="list-style-type: none"> <li>- situated in an area where foot-and-mouth disease has not been reported within a 10-km radius centred on the establishment for a period of at least 30 days immediately prior to the date of collection of the oocytes(1)/ embryos(1);</li> </ul>		

Part II: Certification	II. Health information			
			-	in which foot-and-mouth disease has not been reported during a period of at least 3 months immediately prior to the date of collection of the oocytes(1)/ embryos(1);
	(1)	<input type="radio"/> either	II.3.6.2.	they were not vaccinated against foot-and-mouth disease;]
	(1)(5)	<input type="radio"/> or	II.3.6.2.	they were vaccinated against foot-and-mouth disease during the period of 12 months prior to the date of collection or production of the embryos and
			II.3.6.2.1.	have not been vaccinated against foot-and-mouth disease within the period of at least 30 days immediately prior to the date of collection of the embryos;
			II.3.6.2.2.	the semen used for fertilisation was collected from a male donor that complies with the conditions set out in point 1(b) or the semen complies with the conditions set out in point 2 of Chapter I of Part 5 of Annex II to Delegated Regulation (EU) 2020/686;
			II.3.6.2.3.	prior to freezing, the embryos have been subjected to trypsin washing carried out in accordance with the recommendations of the IETS Manual(6);
			II.3.6.2.4.	the embryos were stored deep frozen for a period of at least 30 days from the date of collection, and during this period the donor animal has not shown clinical signs of foot-and-mouth disease;]
		II.3.7.		comply with at least one of the following conditions as regards infection with bluetongue virus (serotypes 1-24):
	(1)	<input type="checkbox"/> either	II.3.7.1.	they have been kept for a period of at least 60 days prior to and during collection of the oocytes(1)/ embryos(1) in a Member State or zone thereof free from infection with bluetongue virus (serotypes 1-24) where no case of infection with bluetongue virus (serotypes 1-24) has been confirmed during the last 24 months in the targeted animal population;]
(1)	<input type="checkbox"/> and/or	II.3.7.2.	they have been kept in a seasonally disease-free zone, during the seasonally disease-free period, for a period of at least 60 days prior to and during collection of the oocytes(1)/ embryos(1), in a Member State or zone thereof with an approved eradication programme against infection with bluetongue virus (serotypes 1-24);]	
(1)	<input type="checkbox"/> and/or	II.3.7.3.	they have been kept in a seasonally disease-free zone, during the seasonally disease-free period, for a period of at least 60 days prior to and during collection of the oocytes(1)/ embryos(1), in a Member State or zone thereof where the competent authority of the place of origin of the consignment of oocytes(1)/ embryos(1) has obtained the prior written consent of the competent authority of the Member State of destination to the conditions for establishment of that seasonally disease-free zone and to accept the consignment of oocytes(1)/ embryos(1);]	
(1)	<input type="checkbox"/> and/or	II.3.7.4.	they have been kept in a vector-protected establishment for a period of at least 60 days prior to and during collection of the oocytes(1)/ embryos(1);]	
(1)	<input type="checkbox"/> and/or	II.3.7.5.	they have been subjected to a serological test to detect antibodies to the bluetongue virus serogroup 1-24, with negative results, between 28 and 60 days from the date of each collection of the oocytes(1)/ embryos(1);]	
(1)	<input type="checkbox"/> and/or	II.3.7.6.	they have been subjected to an agent identification test for bluetongue virus (serotypes 1-24), with negative results, on blood sample taken on the day of collection of the oocytes(1)/ embryos(1);]	
	II.3.8.		comply with at least one of the following conditions as regards infection with epizootic haemorrhagic disease virus (serotypes 1-7) (EHDV 1-7):	
(1)	<input type="checkbox"/> either	II.3.8.1.	they have been kept for a period of at least 60 days prior to and during collection of the oocytes(1)/ embryos(1) in a Member State or zone thereof where EHDV 1-7 has not been reported for a period of at least the preceding 2 years within a radius of 150 km of the establishment;]	

II. Health information				
Part II: Certification	(1)	<input type="checkbox"/> and/or	II.3.8.2. they have been kept in a vector-protected establishment for a period of at least 60 days prior to and during collection of the oocytes(1)/ embryos(1);]	
	(1)	<input type="checkbox"/> and/or	II.3.8.3. were resident in a Member State or zone thereof in which according to official findings the following serotypes of EHDV exist: _____ and have been subjected with negative results in each case to the following tests carried out in an official laboratory:	
	(1)	<input type="checkbox"/> either	II.3.8.3.1. a serological test to detect antibodies to EHDV 1-7, with negative results, on blood sample taken between 28 and 60 days from the date of the collection of the oocytes(1)/ embryos(1);]	
	(1)	<input type="checkbox"/> and/or	II.3.8.3.2. an agent identification test for EHDV 1-7, with negative results, on blood sample taken on the day of collection of the oocytes(1)/ embryos(1).]	
	II.4.	The oocytes(1)/ embryos(1) described in Part I		
		II.4.1.	has been collected, processed and stored in accordance with animal health requirements set out in Part 2(1)/Part 3(1)/Part 4(1)/Part 5(1) and Part 6 of Annex III to Delegated Regulation (EU) 2020/686;	
		II.4.2.	are placed in straws or other packages on which the mark is applied in accordance with requirements provided for in Article 10 of Delegated Regulation (EU) 2020/686 and that mark is indicated in Box I.30;	
		II.4.3.	are transported in a container which:	
			II.4.3.1.	was sealed and numbered prior to the dispatch by the embryo collection or production team under responsibility of the team veterinarian, or by an official veterinarian, and the seal bears the number as indicated in Box I.19;
			II.4.3.2.	has been cleaned and either disinfected or sterilised before use, or is single-use container;
(1)(7)	<input type="checkbox"/>	II.4.3.3.	has been filled in with the cryogenic agent which not have been previously used for other products;]	
(1)(8)	<input type="checkbox"/>	II.4.4.	are placed in straws or other packages which are securely and hermetically sealed;	
		II.4.5.	are transported in a container where they are separated from each other by physical compartments or by being placed in secondary protective bags.]	
(1)(9)	<input type="checkbox"/>	The in vivo derived embryos(1)/ in vitro produced embryos(1)/ micromanipulated embryos(1) described in Part I were conceived by artificial insemination using semen coming from a semen collection centre, germinal product processing establishment or germinal product storage centre approved for the collection, processing and/or storage of semen by the competent authority of a Member State or by the competent authority of a third country, territory or zone thereof listed in Annex X to Commission Implementing Regulation (EU) 2021/404.]		
(1)(10)	<input type="checkbox"/>	The following antibiotic or mixture of antibiotics(11) has been added to the collection, processing, washing or storage media: _____ ]		
	II.6.			

II. Health information		
Part II: Certification	<p>Notes:</p> <p>In accordance with the Agreement on the withdrawal of the United Kingdom of Great Britain and Northern Ireland from the European Union and the European Atomic Energy Community, and in particular Article 5(4) of the Protocol on Ireland / Northern Ireland in conjunction with Annex 2 to that Protocol, references to European Union in this certificate include the United Kingdom in respect of Northern Ireland.</p> <p>This animal health certificate shall be completed according to the notes for the completion of certificates provided for in Chapter 2 of Annex I to Commission Implementing Regulation (EU) 2020/2235.</p> <p>Part I:</p> <p>Box reference I.11: "Place of dispatch": Indicate the unique approval number and the name and address of the embryo collection or production team of dispatch of the consignment of oocytes or embryos.</p> <p>Box reference I.12: "Place of destination": Indicate the address and unique registration or approval number of the establishment of destination of the consignment of oocytes or embryos.</p> <p>Box reference I.19: Seal number shall be indicated.</p> <p>Box reference I.26: Total number of packages shall correspond to the number of containers.</p> <p>Box reference I.30: "Type": specify if in vivo derived embryos, in vivo derived oocytes, in vitro produced embryos or micromanipulated embryos.</p> <p>"Species": select amongst "Ovis aries" or "Capra hircus" as appropriate.</p> <p>"Identification number": Indicate identification number of each donor animal.</p> <p>"Identification mark": indicate mark on the straw or other packages where oocytes or embryos of the consignment are placed.</p> <p>"Date of collection/production": indicate the date on which oocytes or embryos of the consignment was collected or produced.</p> <p>"Approval or registration number of plant/establishment/centre": Indicate the unique approval number of the embryo collection or production team by which the oocytes or embryos were collected or produced.</p> <p>"Quantity": Indicate number of straws or other packages with the same mark.</p> <p>Part II:</p> <p>(1) Delete if not applicable.</p> <p>(2) Only embryo collection or production teams approved by the competent authority and included in the register referred to in Article 101(1)(b) of Regulation (EU) 2016/429 and Article 7 of Delegated Regulation (EU) 2020/686.</p> <p>(3) Applicable for ovine animals.</p> <p>(4) Applicable for caprine animals.</p> <p>(5) Option available only for the consignment of in vivo derived embryos.</p> <p>(6) Manual of the International Embryo Transfer Society — A procedural guide and general information for the use of embryo transfer technology emphasising sanitary procedures, published by the International Embryo Transfer Society 1 111 North Dunlap Avenue, Savoy, Illinois 61 874 USA (<a href="http://www.iets.org/">http://www.iets.org/</a>).</p> <p>(7) Applicable for frozen oocytes or embryos.</p> <p>(8) Applicable for the consignment where in one container oocytes, in vivo derived embryos, in vitro produced embryos and micromanipulated embryos of ovine or caprine animals are placed and transported.</p> <p>(9) Does not apply to oocytes.</p> <p>(10) Mandatory attestation in case antibiotics were added.</p> <p>(11) Insert the name(s) of the antibiotic(s) added and its(their) concentration.</p>
